SUMMARY

Motivated AI & Machine Learning undergraduate with a strong interest in Python development, AI engineering, and building intelligent agent systems. Skilled in Python, SQL, Pandas, NumPy, object-oriented programming, Machine Learning, Generative AI, LLMs, and AI Agents. Hands-on experience building AI-powered applications and agent workflows using Python, LLMs, Prompt Engineering, Ollama, LangChain, and Pydantic. Seeking a Python Learning Internship to strengthen software development skills while applying Python and AI agent technologies to real-world problems.

EDUCATION

PERIYAR MANIAMMAI INSTITUTE OF SCIENCE AND TECHNOLOGY | THANJAVUR, TAMIL NADU | AUGUST 2023 - PRESENT
B.TECH Computer Science and Engineering (AI and ML)

- CGPA: 8.89

INTERNSHIPS

Larsen & Toubro (L&T) | CHENNAI, TAMIL NADU | JUNE 2026 – JULY 2026 | ON-SITE
AI INTERN

- Built a **personalised AI Persona** using Python, LLMs, and Prompt Engineering for context-aware response generation.
- Developed an LLM evaluation pipeline to assess response accuracy, relevance, consistency, and persona alignment.
- Built AI/ML solutions using Python, OpenCV, OCR, Azure OpenAI Vision, XGBoost, and SHAP for engineering use cases.

UPSTRIDE | CHENNAI, TAMIL NADU | MAY 2026 – JULY 2026 | REMOTE
AI ENGINEER INTERN

- Developed a Python-based **AI Tax Planning Agent** using CrewAI, LLMs, Prompt Engineering, and agent workflows for tax regime comparison, deduction optimisation, and capital gains estimation.
- Integrated Pydantic, MongoDB, and pytest for structured data processing, validation, and reliable AI responses.

CANAAN ED & TECH | CHENNAI, TAMIL NADU | FEB 2026 – MARCH 2026 | REMOTE
DATA ANALYST INTERN

- Used Python, Pandas, SQL, and Excel for data cleaning, transformation, analysis, and exploratory data analysis.
- Developed Power BI dashboards and visualisations to identify trends and generate data-driven insights.

VDART Academy | TIRUCHIRAPPALLI, TAMIL NADU | JUNE 2025 – JULY 2025 | ON-SITE
Full Stack Web Development Intern

- Contributed to the **Smart Intern Management System**, focusing on Asset Management, debugging, feature updates, and application testing.

PROJECTS

AI TAX PLANNING AGENT | Python, CrewAI, LLMs, Pydantic, MongoDB

- Developed an AI agent for tax regime comparison, deduction optimisation, and capital gains estimation using Python, CrewAI, and LLM workflows**.**

PERSONALIZED AI PERSONA | Python, LLMs, Prompt Engineering

- Built an AI Persona that generates context-aware responses based on defined personality, knowledge, preferences, and communication patterns, with an evaluation pipeline for response quality.

DRIVER DROWSINESS DETECTION | Python, OpenCV, CNN, TensorFlow

- Developed a real-time driver monitoring system using computer vision and CNN-based eye-closure detection to trigger fatigue alerts.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS
AI/ML: Generative AI, LLMs, AI Agents, Machine Learning, Deep Learning, NLP, Computer Vision
Frameworks/Tools: CrewAI, LangChain, OpenAI API, TensorFlow, OpenCV, Pydantic
Data: Pandas, NumPy, Power BI, Excel
Web/Cloud: Django REST, React, MongoDB, MySQL, AWS
Tools: Git, GitHub, pytest

CERTIFICATIONS

NPTEL – The Joy of Computing using Python (Jan – Apr 2026)
MATLAB Skills
SQL (Basic) Certificate
